Schweiker Favors Full Probe of CIA

Says People Should Know
Part of Unions, Pupils
In Program

Montgomery County Congressman Richard S. Schweiker, adding his voice to the budding CIA - student-union controversy, said the current dispute raised some questions in his mind.

"I really couldn't pass judgment on the matter until all the facts are at hand," he stated. "For that reason I am in favor of a full investigation into the relationship between the CIA and the student and union groups.

"The crucial part of the case is the question of how much were students and union officials told to do by the CIA? Were they used for espionage or subterfuge of any kind, or were they merely suborned in normal international activities," the Congressman declared.
